Pittsburgh, PA 15219

RE: South Cavalcade site

Dear Mr. Campbell:

During the week of August 12, 1986, Koppers' representatives excavated a portion of Merchants Fast Motors' parking lot in an attempt to locate the abandoned, 552 foot, onsite well. The U.S. Environmental Protection Agency (EPA) understands that those efforts were unsuccessful and would like to recommend the following line of action. First, assemble a small report containing all the information that Koppers has accumulated concerning the abandoned well: the date drilled; the drilling method; drillers log; type of casing; size of casing; screened interval; method and date of abandonment; most likely location, the head difference between the shallow flowing sand and the abandoned wells screened interval(s); location of other wells in the area; etc. Second, a conference call or meeting between EPA, Koppers, and Koppers' contractor to discuss the facts, and alternatives.

EPA would like to receive the report by September 2, 1986, and suggests a conference call on September 4, 1986. As an aside, EPA has several copies of the South Cavalcade Title Search and I am enclosing two copies for Koppers use.

Should you have any questions please contact John at (214) 767-9700.

Sincerely yours,

Larry D. Wright, Chief  
Superfund Enforcement Section
